

Important information on customizing BIM files.

For technical reasons, INLIGHT has to store the INLIGHT product names in the BIM files. Therefore, all RFA and IFC files must be individually customized by our partners if individual product names instead of INLIGHT product names are desired.

Replacing the INLIGHT product names with individual product names is relatively uncomplicated and is the same for both file formats (RFA/IFC).

1. Change the file name, as this bears the INLIGHT product designation and is also mentioned within the respective files. All you have to do is rename the file:

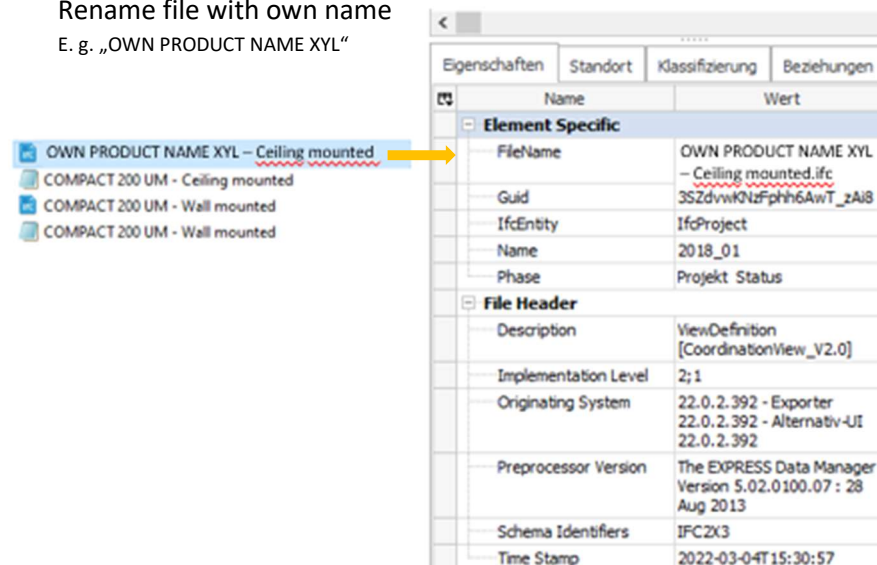

Example IFC file with INLIGHT product name:

Eigenschaften	Standort	Klassifizierung	Beziehungen
Name		Wert	
Element Specific			
FileName	COMPACT 200 UM - Wall mounted.ifc		
Guid	1NCY6hWf110BOTdr9dfqQ		
IfcEntity	IfcProject		
Name	2018_01		
Phase	Projekt Status		
File Header			
Description	ViewDefinition [CoordinationView_V2.0]		
Implementation Level	2;1		
Originating System	22.0.2.392 - Exporter 22.0.2.392 - Alternativ-UI 22.0.2.392		
Preprocessor Version	The EXPRESS Data Manager Version 5.02.0100.07 : 28 Aug 2013		
Schema Identifiers	IFC2X3		
Time Stamp	2022-03-04T16:37:35		

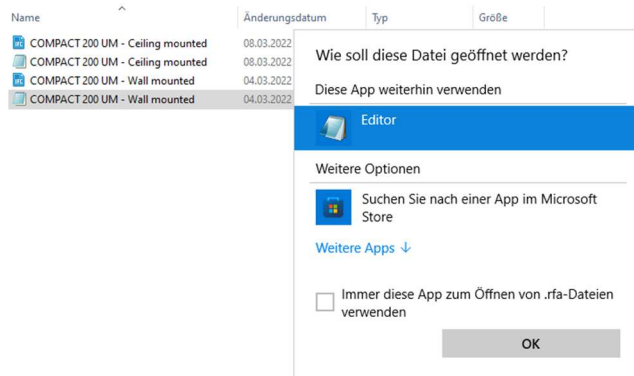

Rename file with own name

E. g. „OWN PRODUCT NAME XYL“

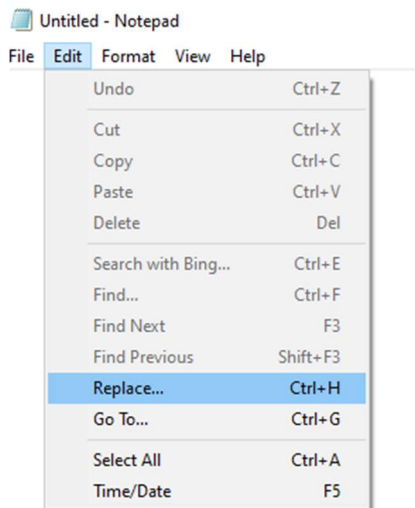

Eigenschaften	Standort	Klassifizierung	Beziehungen
Name		Wert	
Element Specific			
FileName	OWN PRODUCT NAME XYL - Ceiling mounted.ifc		
Guid	3S2dvvKHzFphh6AwT_zAi8		
IfcEntity	IfcProject		
Name	2018_01		
Phase	Projekt Status		
File Header			
Description	ViewDefinition [CoordinationView_V2.0]		
Implementation Level	2;1		
Originating System	22.0.2.392 - Exporter 22.0.2.392 - Alternativ-UI 22.0.2.392		
Preprocessor Version	The EXPRESS Data Manager Version 5.02.0100.07 : 28 Aug 2013		
Schema Identifiers	IFC2X3		
Time Stamp	2022-03-04T15:30:57		

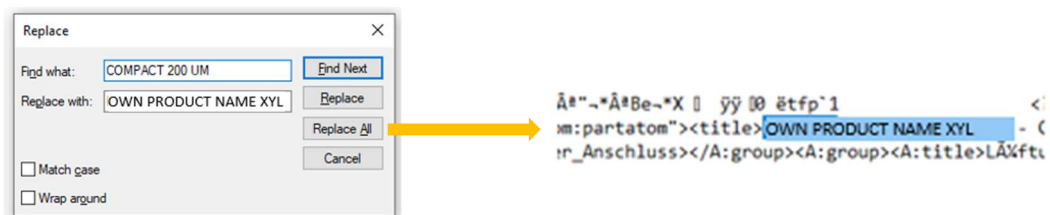

- Open the respective file (RFA/IFC) with an editor (right mouse click on the file, then select "Open with"). An editor is included by default with Windows.

- Choose „Edit“ and then „Replace“ function.

- Enter the complete INLIGHT product name in „Find what“ (name usually corresponds to the original INLIGHT file name) and then enter your own product name in „Replace with“. After that, use „Replace all“ button to substitute the INLIGHT product name with your own product name within the complete file.

- Save file.
- To double check that all names have been replaced successful use the „Find“ function and search again for the INLIGHT product name and also for the Keyword INLIGHT.
- Save and close file.
